PROFESSIONAL SUMMARY

Project Engineer with an MSc (Eng) in Transport Infrastructure: Design and Construction with hands-on experience compiling technical specifications, Employer's Requirements and technical reports for infrastructure and energy projects. Experienced in coordinating inputs from engineers, contractors and clients, tracking deliverables and deadlines, maintaining trackers and records, and checking documents against specification. Graduate Member of the ICE, Member of CIHT, strong written communication and advanced Excel skills.

KEY SKILLS

- **Document and Content Management:** Technical specifications, Employer's Requirements, technical and asset condition reports, drawing and design package review, version-controlled records
- **Tracking and Coordination:** Progress trackers, daily diaries, weekly site reports, meeting minutes, RFI and technical query close-out, deadline monitoring
- **Compliance and Quality Checking:** Reviewing documents and test results against specification, Inspection and Test Plan oversight, non-conformance close-out
- **Stakeholder Liaison:** Principal Contractor, sub-contractors, clients and internal technical teams
- **Sector Knowledge:** Transport and infrastructure, highways and pavements, site drainage, onshore wind and solar
- **Software:** Microsoft Word, PowerPoint and Excel (advanced), Microsoft Project, Primavera P6, CMap, AutoCAD, Civil 3D

PROFESSIONAL EXPERIENCE

Project Engineer / Site Agent, Our Footprints Limited, UK March 2025 – Present

Projects: Lairg II Wind Farm, Sallachy Wind Farm-road project, Coubar Solar Project, Imerys Wind Farm

- Reviewed civil design for access roads, hardstandings, earthworks and site drainage using AutoCAD and Civil 3D, including pavement design.
- Wrote technical specifications and co-authored Employer's Requirements defining design scope, applicable codes and standards, and performance criteria for sub-contract design and construction packages.
- Compiled technical and asset condition reports supporting client investment decisions, including retrofit reporting across 6+ turbines.
- Maintained the site daily diary, weekly site reports, quality reporting and progress meeting minutes as Site Agent on a live 9-turbine wind farm, tracking progress against programme.
- Coordinated inputs from the Principal Contractor, sub-contractors, client and technical teams; closed out RFIs and technical queries to completion.
- Reviewed production drawings and sub-contractor design packages, and sub-contractor materials testing against specification, managing non-conformances through to close-out.
- Managed procurement records across 50+ purchase orders and administered NEC3/NEC4 contract notices, including Early Warning Notices and CVRs.
- Led the company-wide rollout of the CMap platform; reviewed contractor RAMS and carried out weekly and monthly H&S inspections.

Assistant Civil Engineer, Sarthak Constructions, India August 2020 – August 2023

- Produced design calculations and structural analysis for pavement on a 15km highway scheme; performed field testing on aggregates and bitumen and compaction verification against pavement construction specifications.
- Carried out site H&S audits and inspections on a road infrastructure project and prepared feasibility reports, coordinating across design, structural, estimation and project management teams.
- Collaborated with the Quality Assurance team to produce more than 10 detailed site reports, reviewed more than 30 architectural and structural blueprints, and constructed lab and site tests ensuring 100% alignment of design documents with project execution

Intern, Origin Design Studio, India May 2019 – June 2019

- Reviewed structural and architectural production drawings and carried out laboratory and site material testing on a G+3 commercial building, contributing to a 15% reduction in design errors.

EDUCATION

MSc (Eng) Transport Infrastructure: Design and Construction, University of Leeds, UK Sept 2023 – Sept 2024

Modules: Bridge Engineering, Transport Infrastructure Strategy, Monitoring and Maintenance of Structures, Construction Technology

BTech Civil Engineering, Savitribai Phule Pune University, India June 2020 – June 2023

Modules: Geotechnical Engineering, Advanced Surveying, Structural Engineering, Theory of Structures, Water Resource Engineering

CERTIFICATIONS & MEMBERSHIPS

Graduate Member, ICE (working towards CEng) | Member, CIHT | APS Principal Designer (CDM 2015) | IOSH Managing Safely | CSCS Card

PROJECTS

- On-site Owner’s Engineer under FIDIC for a 9-turbine wind farm in the Scottish Borders, leading progress, risk and quality reporting.
- Analysed environmental effects of recycled waste plastic and rubber tyres in asphalt pavements, with Life Cycle Assessment.
- Designed an erectable, lightweight structure for deployment at -20°C in the Indo-Tibet border region, achieving a 50% cost reduction.
